## Business Automation

We improve your day to day business computing with unique, low cost solutions.

Below is a list of existing solutions created for our clients in Nelson and Wellington:

### Microsoft Automation

Automate manually intensive tasks in Excel and Word, reducing time and effort for implementing forms, spreadsheets, or accounting records.

### Data Entry Automation

Improve data integrity and quality by changing from a manual function to an automatic function using repetitive task recording tools.

### Website Automation

Easy updating of business website content using our Content Management System solutions. Allows even non-technical staff to publish new content and images on websites.
